***Truly, in the creations of the heavens and the earth, in the changing of night and day, in the ships that sail in the ocean, and what is good for human beings, and in the water which Allah sends down from the skies, giving life to the earth after it had been lifeless, and in the beasts of all kinds that He sends over the earth, and the change of the winds and the clouds which are driven between heaven and earth. Surely in these are signs for people who understand.***

The Qur'an Sura 2 verse 164
